WWA OB2.2 Task Planning
September 22, 2003

(FR NA / SPR 5373 / DR 13024)

1.   Title: WWA: text pushing to adjacent sites

Description: Passing captured text to adjacent WFOs, an OB3 task listed under DR_12739, requires some prep work prior to the OB3 release. This prep work will cover for intersite data passing between different builds...ie OB2 & OB3. Also, The incorrect VTEC id being pushed to adjacent sites was corrected in this task

Priority: Other

Status: **Delivered (clt code at QA, DR status at HELD)** <9.22.03>

(FR NA / SPR 5359 / DR 12983)

2.   Title: WWA: editable xmit text widget and no more popup editors.

Description: Based on field requests the WWA transmit interface text widget needs to be made editable. This will allow forecasters a last view of the generated WWA product and also provides them the opportunity to make any last minute changes before sending. Virtual segment popup editors and headline editors are no longer needed once the xmit interface text widget becomes editable. These features need be removed from the operational interaction with WWA, but kept in the code for possible use later.   *Also fixes SLS life cycle lock.

Priority: Usability

Status: **Delivered (SPR Delivered, DR status at HELD)** <9.22.03>

SEC/OST Priority Type Classification:

1) WCN/WBC - Watch By County Task

2) VTEC - Valid Time Event Code Task

3) Usability - Usability enhancement, make WWA easier to use, buttonology

4) Other - Everything else
